

MAUI'S BEST FLOWERS CARE

- 1.) Carefully cut clear plastic away from the arrangement.
- 2.) FILL VASE WITH WATER (arrangements arrive without).
- 3.) Mist flowers daily.
- 4.) Change water in vase every three to four days.

Keep in mind that these flowers do not like extreme heat, cold or direct sunlight. Do not store in refrigeration below 55 F. Even with minimal care you will be able to enjoy Maui's Best Flowers for many days longer than other flowers because our unique tropical exotics are shipped directly from our East Maui tropical farm to you

Me ke aloha pumehana
